Highland Tank®

Fire-Hopper

HT-1082

Highland Fire-Hoppers are compact, low-profile state-of-the-art technology for secondarily contained, fire-protected aboveground fuel storage. The UL-2085 listed Fire-Hopper is a double-wall steel tank with light-weight porous insulating material between the two walls, providing thermal protection to the primary tank.

They are used where a fire-protected tank is needed because of setback limitations and/or regulatory insistence.

Fire-Hoppers are suitable for the storage of flammable and combustible liquids. The Fire-Hopper's unique domed top design prevents rain, snow, and other debris from accumulating on top of the tank.

With the tank's small footprint and optional pump and equipment packages, Highland Fire-Hoppers are economical to install.

Weigh the Fire-Hopper Advantages

- Passes 2-hour fire test, hose stream, impact and ballistics tests
- Lightweight
- Double-wall
- Pressure testable
- Unique domed top
- Small footprint
- Low Profile
- Available with pump and equipment packages
- Highland quality with 30-Year STI Warranty
